Senior Manager, AI-Powered UX & Digital Experience at Oracle

Summary

Experienced UI/UX and digital experience leader with over a decade at Oracle, specializing in building scalable, user-centric products across enterprise environments. Proven track record in leading cross functional teams, talent, and driving innovation through AI-driven design and development.

Recognized for combining design leadership, technical strategy, and people development, including managing interns and apprenticeship programs while delivering impactful digital solutions.

Experience

Oracle - Singapore

Senior Manager, AI-Powered UX & Digital Experience

May 2016 - April 2026

- Led UI/UX strategy and delivery for enterprise-scale applications across multiple business units.
- Managed and mentored multidisciplinary teams including designers, developers, interns, and apprentices.
- Directed internship and apprenticeship programs for the past 4 years, guiding early-career talent through structured learning, real-world projects, and professional development.
- Built a strong culture of mentorship, contributing to the growth of junior designers and frontend engineers into high-performing professionals.
- AI-driven solutions, integrating machine learning and intelligent systems into digital experiences to improve usability, personalization, and efficiency.
- Collaborated with stakeholders, product managers, and engineering teams to deliver high-impact solutions aligned with business goals.
- Played a key role in driving innovation in UX practices, aligning design systems with emerging technologies including AI and automation.

Ace:Daytons Communications

Interactive / Digital Art Director

April 2015 - April 2016

- Shape the overall look and feel of digital experiences so everything feels consistent, engaging, and on-brand.
- Turn ideas into visual concepts that work beautifully across apps, websites, and campaigns.
- Lead and mentor a team of designers, providing thoughtful feedback that elevates the overall quality of work.
- Collaborate closely with product, UX, and marketing teams to bring ideas to life from concept to launch.
- Stay current with emerging design trends and technologies, including AI tools, to ensure work remains innovative and forward-looking.

Clubvivre - Singapore

UI / UX Designer & Front End Developer

May 2014 - April 2015

- Design intuitive, user-friendly interfaces that deliver simple, seamless, and enjoyable app and web experiences.
- Turn design ideas into real, working screens using front-end code like HTML, CSS, and JavaScript.
- Working closely with product managers and developers to bring concepts from wireframes to launch.
- Test and improve designs based on user feedback to create smoother, more intuitive experiences.
- Keep up with design trends and modern frameworks to build fast, responsive, and visually polished products.

Vocanic - Singapore

Interactive Designer / Front End Developer

May 2010 - May 2014

- Design and deliver engaging, interactive solutions that create meaningful digital user experiences.
- Translate concepts into responsive, high-quality interfaces using clean, efficient front-end code.
- Collaborate closely with designers, developers, and stakeholders to bring ideas to polished, production-ready products.
- Refine animations, transitions, and micro-interactions to elevate the overall user experience.
- Continuously optimize designs based on user feedback, performance insights, and evolving needs.
